Automate anything, Run anywhere

HCL Automation Orchestrator Suite

Overview Automation Orchestrator Suite

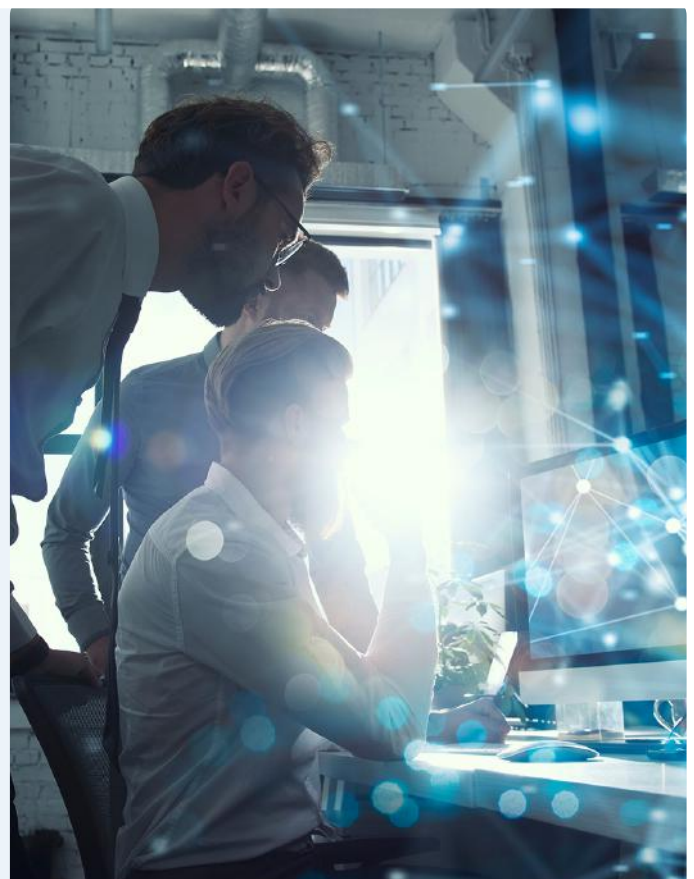

The Automation Orchestrator Suite is the bundle offering comprising of HCL Workload Automation, HCL Intelligent Operations and HCL Universal Orchestrator. It provides an enhanced Automation Platform based on HCL Workload Automation, with the all-new Universal Orchestrator to empower complete cloud native scenarios.

The Automation Orchestrator suite brings speed, agility, and innovations that businesses need to drive more cost-efficiency, customer-centricity, and productivity. It is a one-stop shop for all essential automation needs and enables customizable component utilization based on your requirements.

Capabilities

- ◆ Faster workflow execution for cloud and on-premises workloads
- ◆ Supports Serverless Orchestration
- ◆ Optimize data exchanges between tasks
- ◆ Connect & Automates IT and Business processes
- ◆ Single point of control for the workflow modelling and monitoring
- ◆ AI-based workflow prediction
- ◆ Self-scaling for Universal Orchestrator microservices on Kubernetes.
- ◆ Active-active multi server architecture with automatic workload distribution.

Suite Offering

HCL Workload Automation

HCL Workload Automation boosts your business with the most advanced job scheduling, management, and monitoring capabilities to seamlessly orchestrate complex workflows across multiple platforms and applications.

This platform acts as a meta-orchestrator for continuous automation, leveraging containerization and an intuitive user interface, while offering the lowest TCO on the market. All in one place.

Intelligent Operations

Strategic solutions that enable enterprise automation and innovation. These solutions include:

- ◆ **Clara** - Conversational UI enabling democratization and Self-Service automation with natural language processing interactions
- ◆ **Hero** - Effectively combines centralized application monitoring with Runbook automation, providing a solution dedicated to Workload Automation, that makes your infrastructure easy to control and hassle free.
- ◆ **AIDA** - AI & ML built-in patterns to capture and control process execution. Enables fast troubleshooting and data-driven decision-making to guarantee stability through risk assessment.
- ◆ **T-VREX** - An innovative and versatile HCL solution integrated with Workload Automation, enabling a complete and immersive troubleshooting and collaboration experience.

Automation Hub

Automation Hub is a tool that empowers your Workload Automation with next-gen integrations.

Universal Orchestrator

HCL Universal Orchestrator is a hyperautomation enabler that provides visibility, maps business tasks and processes, orchestrates work across multiple systems, provides complex rule engines, and enables configurable workflows.

Benefits

A digital transformation booster

The HCL Automation Orchestration Suite promises to deliver on today's modern IT environments that include cloud-native infrastructure and big data workloads. Our new offerings will unlock further value by aligning to your future strategic goals and promise to be robust, reliable, and flexible throughout your digital transformation journey.

Lowest TCO in the market

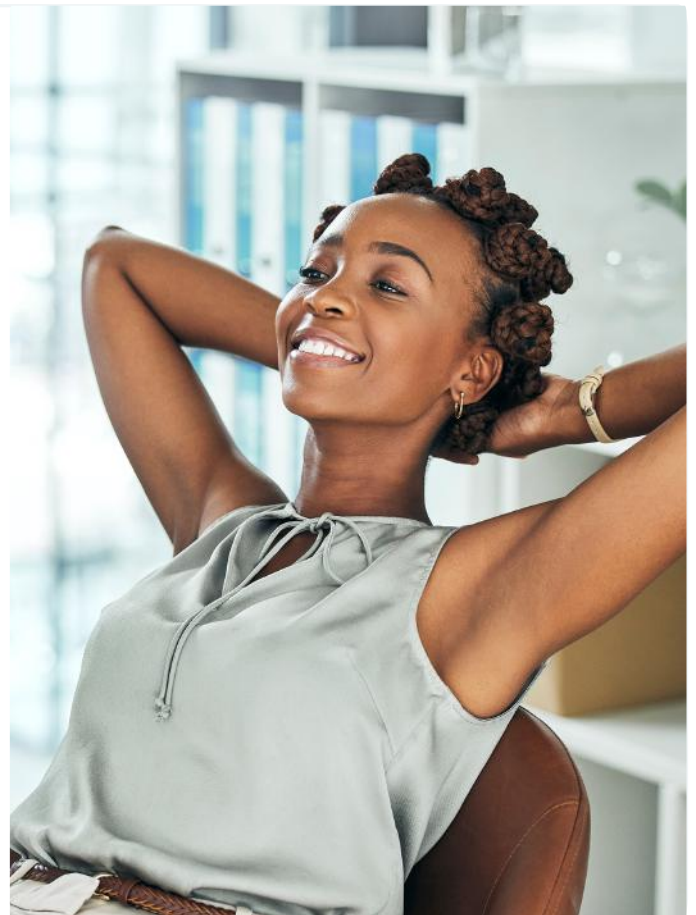

Stop worrying about costs, start enjoying all the features. The HCL Automation Orchestration Suite is proven to save you up to 40% TCO based on competitor's average without any additional hidden costs.

Simplify and control complexity

The Suite provides a single console and an automation engine to manage complex workloads and data pipelines. This minimizes complexity and increases speed and agility by enabling a single platform to manage all business processes, as opposed to relying on a mix of separate tools.

A full range of services

Take advantage of the wide range of services offered by the best HCL experts. We can aid with upgrades, migration, implementation, application integration and health check. Moreover, we can cover your needs and help you detect them with on demand workshops, to deep dive into product features or business scenarios implementations.

About HCLSoftware

HCLSoftware develops, markets, sells, and supports product families in the areas of Digital Transformation, Data, Analytics & Insights, AI & Automation and Enterprise Security platforms. HCLSoftware is the cloud-native solution factory for enterprise software and powers millions of apps at more than 20,000 organizations, including more than half of the Fortune 1000 and Global 2000 companies. HCLSoftware's mission is to drive ultimate customer success with its IT investments through relentless product innovation.
