Code Defense Training

## Build Skills – Reduce Risks

Secure software starts with skilled developers. Training developers effectively, as they code, is the simplest way to embed safe coding practices, cut vulnerability risk and ensure compliance.

### It's Simple: Train As You Code

Embedding in-the moment training that shows developers what to do, while they're doing it, is the fastest way to deliver secure coding without slowing down the process.

### Build Security-minded Skills That Last

Rather than learning security concepts in isolation, developers receive guided training that reinforces safe coding practices and builds a strong security-first mindset.

### Code Smarter and Simplify Compliance

Increase compliance and code quality by training developers to fix issues as code is written—reducing audit gaps, policy violations, and vulnerability backlogs.

over **50%**

of developers report gaps in their security knowledge

### Still fixing avoidable problems? Start preventing them.

When training comes too late, teams miss preventable issues. In-the-moment and role-aware training gives developers the clarity and understanding needed to address vulnerabilities early and avoid costly rework, delays, and incidents.

Source: OpenSSF

## Key Benefits

### Minimize Rework, Maximize Productivity

By writing secure code from the start, teams avoid delays caused by patching, audits, and emergency remediation.

### Achieve Stronger Compliance Outcomes

Training reinforces data protection and privacy, helping teams avoid vulnerabilities that lead to breaches and penalties.

### Fix Code Earlier and Reduce Costs

Fixing vulnerabilities during the development process is far less expensive than after code deployment.

### Improve Developer Skillset

Train developers to think more about security from the start, resulting in higher-quality code and fewer repeat vulnerabilities.

### Foster a Security-first Culture

Training promotes a mindset where security is everyone's responsibility—not just the security team's role.

**HCLSoftware**

## Training Package Options

### Code Defense Training **PRO**

Integrate training into your existing platforms and workflows, making it easy to deploy without disrupting how teams already work.

### Code Defense Training **ENTERPRISE**

Delivers broad content access, personalized role-based training journeys, and rich reporting to drive learning impact across the organization.

### Code Defense Training **EVENTS**

Immersive, hands-on exploit and defend training experiences with instructor-led support and multiple Tips & Techniques sessions.

## Key Capabilities

### In-the-Moment Training

Get expert assistance when viewing vulnerability scan results, with specific links related to the threat, to enhance your knowledge quickly and apply code fixes faster.

### The Right Training for Every Role

Experience realistic, hands-on scenarios tailored to your role, helping you build the practical skills to identify and prevent vulnerabilities in real-world code.

### Get in the Mindset of an Attacker

Cyber Ranges deliver immersive, hands-on training that mirrors real-world applications and attack scenarios, helping teams practice finding and fixing vulnerabilities in production-like environments.

### Step-by-Step Skill Building

Level up and build skills step-by-step, guiding developers from fundamentals to advanced secure-coding mastery—polish your skillset and code quality.

### About HCLSoftware

HCL Software is a global leader in software innovation, dedicated to powering the Digital+ Economy. We develop, market, sell, and support transformative solutions across business and industry, intelligent operations, total experience, data and analytics, and cybersecurity. Built on a rich heritage of pioneering spirit and unwavering commitment to customer success, we deliver best-in-class software products that empower organizations to achieve their goals. Our core values of integrity, inclusion, value creation, people centricity, and social responsibility guide everything we do. HCL Software serves more than 20,000 organizations, including a majority of the Fortune 100 and almost half of the Fortune 500. 02FEB2026.
