

HCL OneTest UI

Automate and validate business process flows to ensure high quality applications

Take automation all the way from mainframe terminals with 3270 interfaces, through .NET and Java based thick client applications, to mobile Android and iOS devices. Simple yet powerful scripting tools allow you to empower complex test assertions with just a few clicks and embed automated testing into the development process to increase the quality of deliveries.

Benefits & Value

Improve Speed and Coverage: Automate tests previously done by error-prone manual processes.

Improve Quality: Achieve fast, comprehensive testing optimized for development environments while yielding higher quality products.

Reduce Cost: Find defects early when they're less costly to fix.

Simplify Teamwork: Share tests seamlessly with HCL OneTest Server collaboration framework.

Capabilities

- **Automated testing** of desktop, mainframe, mobile and responsive HTML 5-based web applications
- **Natural-language scripting environment**, no programming knowledge needed
- **Automated regression testing** for traditional GUI clients
- **Integration with HCL OneTest Data** for on-demand synthetic test data generation
- **Powerful** extensibility SDK
- **Simple** record, enhance, and execute model
